Zisis Maras

Software Engineer

Experience

Freelance software engineer

Jan 2020 - Today

Senior infrastructure engineer at GuestFlip

Jun 2019 - Jan 2020

Design and implementation of core data pipelines and processing queues.

Technical lead at Viral Loops

Sep 2017 - Jun 2018

Helped manage our ever increasing development team while also evolving our system to keep up with our growth.

Designed some key infrastructure components like the analytics platform and the Viral Loops Pages cdn, among others.

I was also a member of the product & growth teams, helping with product design and growth experiments.

Full stack software engineer at Viral Loops

Jan 2016 - Sep 2017

Been a part of the development team from the very beginning. Helped with the launch of our initial mvp and the plethora of features and scaling needs that followed.

Freelance software engineer

2011 - 2015

Freelance work in many different environments and contexts while studying for my computer engineering degree.
